**Dear Friends and Colleagues,**

WPMC 2023 invites you to discuss the current status and technical challenges of future water-related problems and environmental concerns in arid and semi-arid regions of the world especially in the Mediterranean region. The water problem in Mediterranean countries will focus on water quality and quantity in the broadest sense. The conference brings together researchers in science, society, and the environment to examine water problems from a multidisciplinary perspective.

**The topics of interest include but are not limited to the following:**

Track 1: Water Resources

Track 2: Water Conservation

Track 3: Utilization of New Technologies in the Study of Arid and Semi-Arid Environments and their Natural Resources

Track 4: Water Resources Management and Planning

Track 5: Groundwater

Track 6: Water Pollution

Track 7: Aquatic Ecosystems

Track 8: Integrated Water Resources Management

Track 9: Artificial Intelligence Tools in Hydrology and Climatic Researches

Track 10: Smart City
